Professional Summary

An innovative and detail-oriented Software Developer with expertise in full-stack software development, specializing in creating scalable, efficient solutions across multiple programming languages and frameworks. I value respect, integrity, and accountability with a proven track record of delivering quality products with a strong focus on technical innovation, system optimization, and collaborative problem-solving.

Technical Skills

Programming Languages

- **Language** : C#, Java, JavaScript, Python, Kotlin, C++.
- **Web Technologies**: HTML, CSS, XML, JavaScript.

Development Specializations

- **Full-Stack Development**: End-to-end application design and implementation.

Frameworks & Technologies

- **Backend Frameworks**: Spring, ASP.NET.
- **Frontend Frameworks**: React, Knockout.js
- **Database Systems**: NoSQL, SQLite, MySQL

Work History

JUNIOR SOFTWARE DEVELOPER

Mentorship program : September 2022 – June 2023.

- Developed and maintained web applications using C# and JavaScript.
- Collaborated effectively in a team environment to design and implement new platform features.
- Gained hands-on experience in collaborative software development

MID-LEVEL FULL STACK DEVELOPER

Professional Attachment : September 2023 – December 2023.

- Engineered full-stack interactive websites using ASP.NET and Knockout.js
- Enhanced user interface and experience, resulting in a 40% increase in customer satisfaction
- Implemented responsive design principles ensuring cross-device compatibility
- Developed RESTful APIs for seamless third-party application integration

CONTRACT FULL STACK DEVELOPER

Contract: January 2024 – May 2024.

- Built full-stack applications for using .NET frameworks, including Xamarin and C# for a startup company.
- Enhanced user experience with responsive design and seamless third-party integration via RESTful APIs.
- Implemented responsive design principles to ensure compatibility across various devices.

FULL-TIME SOFTWARE DEVELOPER

Software Developer: August 2024 – Present.

- Leading full-stack development of advanced web applications with ASP.NET and Knockout.js.
- Enhancing user experience through interface optimizations and responsive design.
- Developing robust RESTful APIs to streamline third-party system integrations and performance.

Education

Bachelor of Information Technology: Jomo Kenyatta University of Agriculture and Technology (JKUAT)

- **Expected Graduation:** June 2025
- **Degree Program:** Bachelors degree in Information Technology
- **Relevant Coursework:**

High School Certificate : Kasagam High School

- **Graduated:** 2019

Achievements and Personal Projects

Technical Proficiency:

Comprehensive understanding of core programming concepts:

- Object-Oriented Programming (OOP)
- Data Structures and Algorithms
- Advanced Control Structures

Proficient in multiple programming languages and frameworks

Personal Projects:

- **E-Commerce Website**
 - Developed a dynamic online shopping platform
 - Technologies: Java, C#, Web Development Frameworks
 - URL: <https://g-hut-eight.vercel.app/>
- **Meditation Android App**
 - Created a comprehensive mindfulness application
 - Technologies: Kotlin, Android Development
 - Features:
 - Guided meditations
 - Interactive exercises
 - Multimedia integration
 - Repository: <https://github.com/Merns999/MediApp>
- **QR Code Generator**
 - Developed a utility application for efficient QR code creation
 - Repository: <https://github.com/Merns999/QRGenerator>
- **Personal Portfolio Website**
 - Showcased full-stack development skills
 - URL: <https://intro-teal.vercel.app/>

To stay updated with industry advancements, I actively pursue learning through platforms like Coursera, Cisco Networking Academy, and edX. For a closer look at my work, visit my GitHub repositories : github.com/MansurAkidah.

Hobbies : Gaming(Basket Ball, Video Games) • Art • Programming • Photography • Biking • Hiking
